

APPLICATION FOR RESTRICTION ORDERS – N10

I am N10 and make this statement in support of an application for restriction orders to be made sufficient to protect myself and my family from unnecessary interference with our private lives.

I am aware that the Metropolitan Police Service have completed a risk assessment which sets out the details of my police service including details and dates of my deployments within the SDS as well as some of the difficulties me and my family have faced since my identity as an undercover police officer has been disclosed. For that reason, I do not repeat those details in this statement.

Since October 2011 I have been subject of an ongoing campaign by activists to prevent me working as an academic. While this has so far stopped short of visible visits to my home address it has demonstrated the visceral hatred that a small but committed group of activists have towards me. For example, in 2015 I was photographed by an activist while drinking coffee with colleagues in a canteen at London Metropolitan University, and this was subsequently posted on twitter with a message to the effect 'rapist get out of our canteen'. On two occasions I have been confronted by hostile activists while travelling to work. In December 2015 I resigned from my two university posts but I am continuing to work as an independent academic from home and so will continue to be a target for the same activists.

There is also ongoing activist / research investigation of all aspects of my career in policing, academia and family life.

[REDACTED]

In July 2012 I was re-united with my son who was born in 1985 during my undercover role; his mother only discovered my true identity at this time and has since received substantial compensation from the MPS.

[REDACTED]

For the sake of my wife and family I am concerned that the Inquiry will present a hard core of activists with opportunities to continue to identify and publicise all aspects of my life, including my home address.

Given my academic profile I recognise that my identity is in the public domain and so I do not seek an order for anonymity. I would however seek other measures to protect the disclosure of my home address and other personal details such that my family will not be located and targeted and that my movements to and from Court will not be tracked.
