[REDACTED] BAND A1

Forgot to mention I had a meet with Roger Harding where we agreed that IMOS could not possibly go into deep storage with the Inquiries starting. I also indicated that [REDACTED] would cause access problems. He said he would progress arranging for it to move to ESB possibly as early as Christmas. I asked him to discuss with you to ensure you are happy with that. Can I take it you are? It was also discussed at SO COG where there was general agreement re it going to [REDACTED]

Yours

Neil Hutchison

Daniel

I think that myself , Roger Harding and Neil Hutchinson, have an outstanding join action from the Last two IASB's .

I don't see to have been sent any minutes,

I understand that one action is to set look at the storage requirement for IMOS in SO15 in light of the public enquiry.

Gratehul if you could confirm the actions.

Roger you mentioned the possiibility of secure accommodation in [REDACTED]. Is that the only option?

Regards

[REDACTED] BAND A1
