

N104P - Impact Statement

I am the long term partner of the Core Participant now identified as Carlo Neri [N104]. I write this statement to set out my concerns about the impact on Carlo and on our family and me should his true identity be revealed and confirmed to the Public Inquiry, core participants and the wider public.

I believe this would lead to a high risk of my own identity being revealed which I do not want. These concerns relate to both my personal and professional well-being, and for the well-being of our wider and extended family.

[REDACTED]

[REDACTED]

I am greatly concerned that if my partner's true identity is revealed, and therefore me being identified as his partner, this would add increasing stress and pressure on us.

[REDACTED]

this was something that made me extremely uncomfortable and anxious due to the nature of the security needed surrounding my partner's work. I do not engage in social media because of the importance that I attach to level of security needed.

[REDACTED]

[REDACTED]

[REDACTED]

I am immensely worried about the physical risk to my partner, myself and our [REDACTED] family. I am aware that my parents and siblings are also concerned about this and that they are concerned if Carlo's true identity is confirmed they themselves could be targeted.

The whole of the time that I have known Carlo he has had a continuing and overwhelming fear of his true identity being discovered, even though he had done a job that he was asked to do and believed in. The constant worry and anxiety that this has caused him has had an immeasurably negative impact on his well-being, and as a consequence an almost unbearable pressure on us as a family. This remains the case, but would certainly worsen considerably through revelation of his details, family name and true identity. The impact this would have physically, mentally and emotionally for Carlo and the family around him, including myself, causes me grave concern.

Signed...Partner of Carlo Neri. dated... 28/07/2016.
