

N104R

I am the **relative** of the Core Participant now identified as Carlo Neri. I make this statement to express my concerns about the impact on him and on me and our family should his true identity be made public.

The stress now lies in an underlying feeling of fear and caution towards anyone we come into contact with **_____**. I now constantly worry if they are friend or foe and if they will harm us in some way - I have been imagining all the ways my family **_____** can be hurt or damaged by anyone wanting revenge for the job done by Carlo. It troubles me greatly that he was asked to perform this job and is now being put through this situation with no end in sight.

My **_____** has had to explain his job to me in great detail and I now feel both he and we as a family have been let down by the assurances that were given to us when he was doing this job.

In our **_____** life we are always watching who is around us - even when I am shopping **_____**, worried that someone is watching us, it has made us all paranoid.

[REDACTED]

[REDACTED]

I feel an urgent need to protect ourselves in every way possible and I try to figure out every way we could be hurt, [REDACTED] - it's an awful kind of hazard analysis situation.

[REDACTED] I worry now about what might happen if Carlo's true identity is revealed.

[REDACTED]

I am greatly concerned as to what could happen if Carlo's true identity is made public and our family name is exposed. Life will become very, very difficult and we will probably be forced to [REDACTED] move. I try not to think about it but it is a constant nagging fear.

Again I am constantly trying to figure out escape routes and damage limitation. This is not what I thought I would be doing at this stage of my life and through no fault of me or my family. My [REDACTED] was asked to do a job which was authorised by his bosses at the highest level.

[REDACTED] It feels to us that he and others like him are being abandoned and used as scapegoats.

My health [REDACTED] has been affected by the worry [REDACTED] We truly worry about what the future holds for our family.

We are trying very hard to carry on with our lives doing what we have always done but it is proving very difficult for all of us, if potential [REDACTED] publicity or exposure could be avoided, this would reduce the possibility of this situation deteriorating further and potentially putting us as a family at risk of physical harm or further psychological damage. We feel completely let down and abandoned by the Police and British Government after Carlo did a difficult, demanding job which has in the intervening years taken a great toll on him psychologically and physically.
