

Additional information to be read further to the gisted risk assessment for HN76

Section 4, second paragraph – replacement text:

“There were positive assessments of HN76’s deployment, and HN76 received praise for setting high standards and a professional approach. HN76’s intelligence reports were considered to be of a high quality, and of benefit. HN76 provided significant quantities of reporting upon HN76’s target group(s). However a review of SDS operations in the last years of existence of the SDS was highly critical of SDS UCOs, including HN76 who was criticised for lacking communication skills and being unwilling to answer the author’s questions. There is recognition of the potentially serious ramifications of HN76’s deployment.”

Section 4, final paragraph – replacement text:

“HN76 received multiple commendations, the majority of which do not relate to undercover work. HN76 also received letters of thanks in connection with his/her work as a UCO.”
