NOTE FOR Liaison file

1. On Thursday 20 January 1983, I visited SDS for discussions with DCI Dave Short and DI [REDACTED] HN68 and a pub lunch afterwards.

2. SDS returned their copy of serial [REDACTED] and the set of photographs and provided considerable help with identifications. This was done in script and passed by me to P7 [REDACTED]. As per serial [REDACTED] of [REDACTED] SDS kept two additional copies of the photographs for their own and WFSF records.

3. I handed over copies of briefs at [REDACTED] and [REDACTED], and photographs of [REDACTED].

[REDACTED]

5. We discussed the availability of computer print outs from the SWP computer. SDS thought that in due course it would be possible for their source to have access to all computer print outs. He has recently obtained a copy of the list of SWP organisers by area which is in the process of being turned into an SDS report. SDS saw no point in passing out the print out which they would keep in their offices. At present they are not certain about when membership records will be computerised but the source will report on this when he has further information. In further pursuit of information required in serial [REDACTED] I asked if the SDS source could tell us the current whereabouts of the 1982 record cards.

6. I asked if the SDS source could give me a report of the likelihood of "turning" [REDACTED] an ex-member of a Trotskyist group [REDACTED]

7. I passed on the request from F1 [REDACTED] for details of the membership of the new national executive of CND.

/....

[REDACTED]

8. F7 [REDACTED] had commented on the lack of recent reports from RCPB(M/L) source. SDS confirmed that they were trying to redeploy him into South London RCP but that he was still mixing with his present Maoist comrades. In general, they felt that although the man had tried hard within RCPB(M/L) it was so security conscious and not particularly active that it might take years to get somebody into a position to provide the kind of information that we wanted.

9. [REDACTED]

10. [REDACTED]

A new SDS source

[REDACTED] may try and cover the ALF* and provide a back-up for the existing coverage of CND.
