"6" Squad (S1. [REDACTED] 2) + together with this assessment it will show that the scene is set for a violent afternoon on Saturday 13 Aug.

With regard to the acquisition of the "personal" gas canisters which are prohibited in this country, S1 [REDACTED] 3 does not have any details of the persons alleged to have them - it is part of information he has produced under difficult conditions because, as you know, there is no "co-operation" whatever from the NF since the last episode in Leamington recently.

Commander Ops.

The worst fears of this day's events proved well founded and the Left/Right "confrontation" produced a greater level of violence and arrests than experienced on 23 April at Ducketts Common. There was a great number of injuries to police and demonstrators.

All the Branch officers involved carried out their tasks very efficiently under difficult conditions and gave valuable contributions to the final report.

I suggest the following action:

- a) Send copy report with all appendices to Box 500.
- b) Send copy report and unreferenced appendices to Home Office under cover letter to [REDACTED].
- c) Send copy report and unreferenced appendices minus D and E to Commander A8.
- d) Send copy report and unreferenced appendices minus D and E to Commander A7.
- e) Chief Superintendent 'C' Squad to see, please.
- f) Room 1834 to see and retain copy report.
- g) Coverage of court proceedings has been fully arranged.

Superintendent [redacted] is to be congratulated on his comprehensive demonstration de-briefing - a new innovation in my experience, and DAC 'A' (Ops) has already expressed interest in obtaining SB views on police/demonstrators' tactics. SDS are currently compiling a report incorporating their views on this subject and when this is to hand, I will consider the best way of putting our joint views to AB.

I endorse DI [42] [redacted]'s observations that DC [43] [redacted] has produced a comprehensive schedule of arrests here and that he could usefully collate all the Court results of the 'Lewisham Confrontation' in the same way. This would prove a necessary prelude to the final report on the incident which DI [44] [redacted] is preparing for the information of Box 500 (minutes 23 and 57 refer.)
